Abstract

Your abstract.

1 Introduction

Your introduction goes here! Simply start writing your document and use the Recompile button to view the updated PDF preview. Examples of commonly used commands and features are listed below, to help you get started.

2 Some examples to get started

2.1 How to create Sections and Subsections

Simply use the section and subsection commands, as in this example document! With DocCollab, all the formatting and numbering is handled automatically according to the template you've chosen.

2.2 How to include Figures

First you have to upload the image file from your computer using the upload link in the file-tree menu. Then use the includegraphics command to include it in your document. Use the figure environment and the caption command to add a number and a caption to your figure.

2.3 How to add Tables

Use the table and tabular environments for basic tables.

Item	Quantity
Widgets	42
Gadgets	13

Table 1: An example table.

2.4 How to add Lists

You can make lists with automatic numbering:

1. Like this,
2. and like this.

Or bullet points:

- Like this,
- and like this.

2.5 How to write Mathematics

L^AT_EX is great at typesetting mathematics. Let X_1, X_2, \dots, X_n be a sequence of independent and identically distributed random variables with $E[X_i] = \mu$ and $\text{Var}[X_i] = \sigma^2 < \infty$, and let

$$S_n = \frac{X_1 + X_2 + \dots + X_n}{n} = \frac{1}{n} \sum_i^n X_i$$

denote their mean.

3 Conclusion

We hope you find this document useful!
