

Your abstract.

Introduction

Your introduction goes here! Simply start writing your document and use the Recompile button to view the updates.

Once you're familiar with the editor, you can find various project settings in the DocCollab menu, accessed via the top left of the editor window.

Some examples to get started

How to create Sections and Subsections

Simply use the section and subsection commands, as in this example document! With DocCollab, all the formatting is handled for you.

How to include Figures

Mas eu Não sei nada disto

First you have to upload the image file from your computer using the file-tree menu.

Note that your figure will automatically be placed in the most appropriate place for it, given the surrounding text and the figure's caption.

[h] [width=0.8]imagens/frog.png Descrição da imagem including images on DocCollab.

[width=0.25]frog.png This frog was uploaded via the file-tree menu.

How to add Tables

Use the table and tabular environments for basic tables — see Table ??, for example. For more information, please see the LaTeX documentation.

Item	Quantity
Widgets	42
Gadgets	13

An example table.

How to add Comments and Track Changes

Comments can be added to your project by highlighting some text and clicking “Add comment” in the top right of the editor window.

Track changes are available on all our <https://www.DocCollab.com/user/subscription/planspremium> plans, and can be used to track changes to your document.

How to add Lists

You can make lists with automatic numbering ...

Like this,

and like this.

...or bullet points ...

Like this,

and like this.

How to write Mathematics

L<sup>A</sup>T<sub>E</sub>X is great at typesetting mathematics. Let  $X_1, X_2, \dots, X_n$  be a sequence of independent and identically distributed random variables with mean  $\mu$  and variance  $\sigma^2$ . Then as  $n$  approaches infinity, the random variables  $\sqrt{n}(S_n - \mu)$  converge in distribution to a normal distribution with mean 0 and variance  $\sigma^2$ .

denote their mean. Then as  $n$  approaches infinity, the random variables  $\sqrt{n}(S_n - \mu)$  converge in distribution to a normal distribution with mean 0 and variance  $\sigma^2$ .

How to change the margins and paper size

Usually the template you're using will have the page margins and paper size set correctly for that use-case. For example, the A4 template has margins of 25mm on all sides and a paper size of 210mm x 297mm.

If however you're using a more general template, such as this one, and would like to alter the margins, a common way to do this is by using the margins package.

How to change the document language and spell check settings

DocCollab supports many different languages, including multiple different languages within one document.

To configure the document language, simply edit the option provided to the babel package in the preamble at the top of the document.

To change the spell check language, simply open the DocCollab menu at the top left of the editor window, scroll down to the spell check settings, and select the language you want to use.

How to add Citations and a References List

You can simply upload a .bib file containing your BibTeX entries, created with a tool such as JabRef. You can then use the cite command to insert citations into your document.

If you have an <https://www.DocCollab.com/user/subscription/plansupgraded> account, you can also import your Mendeley or EndNote library.

Good luck!

We hope you find DocCollab useful, and do take a look at our <https://www.DocCollab.com/learnhelp> library for more information.
